 Johannesburg Stock Exchange	CFDs	80 ZAR	-	15 bps

1) Stocks traded below 1 CAD, the commission is capped at CAD 15/trade.

2) To cover the IFTT costs related to Saxo Bank's hedge of the client position the trade is charged an extra 5bps on each side (Buy and sell) to cover the cash hedge and 2bps to cover the broker side derivatives tax on the CFD. Also, Italian Financial Transaction Tax is added on top of the commission for both CFD and cash Stock trades.

3) Local stamp tax on the hedge (in brackets) is added to the commission on the CFDs so total commission charged is both numbers. For Athens Exchange the 0.2% sales tax, charges as half on buy and half on sales the exchange fee and clearing charge is charged on both sides."

SAXO BANK - ACTIVE PRICING PLAN

Rates and Conditions, valid from 16 November 2015

TERMS & CONDITIONS

In order to qualify for Equity Active Trader rates you need to place at least 100 trades per calendar month, within any of the following instruments:

- Stocks
- ETFs/ETCs
- Single Stock CFDs

Should you be eligible to trade leveraged products your rates are as stated above.

Please note with regards to Futures, Stock Options and Contract Options rates, if no agreement exists to the contrary, clients will be charged the highest price category in the relevant table. Contact Saxo Bank to apply for another price category, if applicable, based on previous trading volumes. Moves to different price categories take place at the discretion of Saxo Bank and always take effect from the beginning of the following month without any adjustment in commissions already paid.

OTHER TERMS & CONDITIONS

FINANCING	TYPE	LONG (MARKUP)	SHORT (MARKDOWN)	
Single Stock CFDs ¹⁾	O/N Financing	+2.50%	-2.50%	
Index Tracker CFDs	O/N Financing	+2.50%	-2.50%

Custody Fee	Fee	12 bps per quarter (if no trades placed)		
Inactivity Fee	Fee	100 USD per 180 non trading days		

1) The overnight financing charge will differ for the following exchanges

Exchange:	Long (markup)	Short (markdown)
Athens	4.5%	-4.0%
Johannesburg	5.0%	-3.5%

Overnight Financing

As Single Stock CFDs at Saxo Bank are a margined product, you finance the traded value through an overnight credit/debit charge. If you open and close a CFD position within the same trading day, you are not subject to overnight financing.

When you hold a Single Stock CFD position (or an ETF/ETC CFD position) overnight (i.e. have an open CFD position at close of market on the Stock Exchange, your CFD position will consequently be subject to the following credit or debit:

When you hold a long CFD position, you are subject to a debit calculated on the basis of the relevant Inter-Bank Offer Rate for the currency in which the underlying share is traded (e.g. LIBOR) plus a mark-up (times Actual Days/360 or Actual Days/365).

When you hold a short CFD position, you receive a credit* calculated on the basis of the relevant Inter-Bank Bid Rate for the currency in which the underlying share is traded (e.g. LIBID) minus a mark-down (times Actual Days/360 or Actual Days/365).

The credit/debit is calculated on the total nominal value of the underlying Stock(s) at the time the CFD contract is established (whether long or short).

*Should the relevant Inter-Bank Bid Rate minus the mark-down result in a debit as opposed to a credit, then you will pay the finance charge.
